RADAR-SHIELDING LINER (TIR, RADAR)

The radar-shielding liner is designed for installation as an inner layer in both large hangars and tents. It protects equipment and personnel against detection by reconnaissance sensors operating in the radar and thermal infrared ranges.
An additional benefit is thermal insulation, while its white colour provides greater brightness inside the structure.

BENEFITS

- EFFECTIVE PROTECTION AGAINST DETECTION
- RELATIVELY LOW WEIGHT
- THERMAL COMFORT
- SCALABILITY
