TARP (UV, VIS, NIR, TIR, RADAR)

The winter camouflage screen is a lightweight, multispectral (UV, VIS, NIR, TIR, RADAR) solution for an individual soldier that can be connected to form larger modules.
By accurately reproducing winter conditions through UV reflectance matching that of snow, it blends effectively into snowy surroundings. It can be used to camouflage equipment and conceal temporary positions, as well as serve as an individual soldier's shelter tarp.
Supplied in a durable bag with a backpack function.

BENEFITS

- EFFECTIVE CAMOUFLAGE IN THE UV SPECTRUM
- MODULAR
- REVERSIBLE
- LIGHTWEIGHT
- WATERPROOF
